	Examiner Michele Kidwell	Art Unit 3761	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, figures 1 – 3, in the reply filed on February 22, 2011 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The applicant states that claim 3 has been amended to convert to a dependent claim as should be included Group I. Claim 3, as correctly noted by applicant, is supported by figures 6 and 7. Since figures 6 - 7 are encompassed by Group IV as set forth in the original election of species requirement, this claim will not be considered for examination purposes as applicant has elected Group I.

Accordingly, claims 2 – 3 and 5 – 8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on February 22, 2011.

Specification

Claims 9 – 10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims 9 – 10 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Onishi et al. (US 7,238,175).

With reference to claims 1 and 4, Onishi et al. (hereinafter “Onishi”) discloses a development type paper diaper adapted to be worn on a human body for absorbing and holding excrement, comprising a back sheet (3), a first absorbent (4), a leakage preventing sheet (10/19) allowing no liquid permeation, a second absorbent (6) and a top sheet (5) in the recited order, wherein said first absorbent extends, when worn, from the back side through the crotch to the abdomen side of the user, said second absorbent extends, when worn, from the back side to the crotch of the user, said second absorbent leaves said first absorbent from said crotch to said back side thereby to form a pocket for holding the excrement between said first absorbent and said second absorbent, said leakage preventing sheet is arranged to contact in said pocket with said second absorbent, and said top sheet is so conformed to the shape of said pocket as to cover said leakage

preventing sheet as set forth throughout the disclosure, see especially figure 6. The excrement containing gathering (7) is shown best in figure 7.
